

# Stay

They go weak in the knees when you smile at them

When you roll up your sleeves they almost die

So you pick your favorite one and go home with them

But you know in the morning time you're gonna wanna say goodbye

**Chorus:**

**And don't it get old when you're livin your life that way**

**Don't it get cold in the morning when she goes away**

**Don't you want someone to hold you**

**Don't you want someone to love you**

**Don't you want someone to know**

**You're there to STAY**

You got a long trail of tears right behind you

There are too many broken hearts to even count

And as after you're making love you know they'll hate you

Because you're using their bodies up, and leavin their hearts on the ground

**Chorus**

But baby when the lights turn on  
Don't you wish you had someone  
To share your thoughts, your pain, and your happiness too  
Baby you don't have to run  
Even though it might be tough  
To let down your walls and let somebody in

And don't you get tired of livin your life that way  
Don't it get cold when your heart has no place to stay

Don't you want someone to hold you  
Don't you want someone to love you  
Don't you want someone who knows

You're there to STAY, Oh won't you STAY, Oh will you STAY, Oh won't you  
STAY?
